

In a day when Superheroes abound, we are used to images of masked men and dazzling machines. We are caught in the movie magic with all it's drama and excitement. We applaud when the "good guy" wins and "truth" prevails. But in the real world... Superheroes are not around when you need them. There are no Superheroes to come to the rescue when you are a retired Plumber or Pipefitter. No one rides in on a white horse when you face life's true challenges.

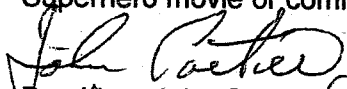

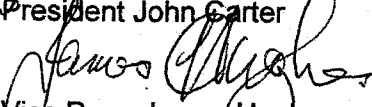

He doesn't ride a white horse or wear a mask and cape...he doesn't sling a web nor have a magic rope...he doesn't look like a Superhero, but he is a hero none the less.

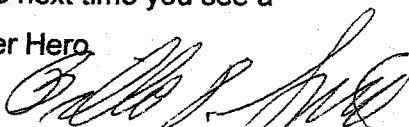

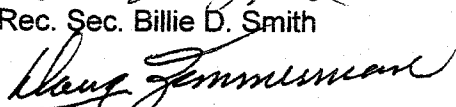

Jerry Neil Paul is our hero. He could have chosen to do a thousand different things. He could have chosen to live dozens of different places. He could be helping hundreds of wealthier more affluent people. But instead, he chose to help us.

Jerry has chosen to help you and I... the working man... the average guy...the retiree. The battlefield is the health care. The enemy is Mesothelioma. *Asbestos related mesothelioma, lung cancer, Benzene/solvents related AML type Leukemia, or Manganese related welding disease accompanied with Parkinson's like symptoms known as Manganism.*

Jerry Neil Paul of *Paul, Hanley & Hanley LLP* has led the charge and is helping to win the battle. We just want to take a moment to thank him and tell him how much we truly appreciate his efforts.

There will never be a Hollywood movie about him, but the next time you see a Superhero movie or comic...think about Jerry...Our Super Hero.
